RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 168 pages. Original publisher: Washington, DC : U. S. Nuclear Regulatory Commission, Office of Nuclear Regulatory Research, 2008. OCLC Number: (OCoLC)301817423 Subject: Nuclear power plants -- Piping -- Earthquake effects. Excerpt: . . . 1 INTRODUCTION Prior to the establishment of the Japan Nuclear Energy Safety Organization (JNES), the Nuclear Power Engineering Corporation (NUPEC) of Japan conducted a multi-year Ultimate Strength Piping Test Program for the Ministry of Economy, Trade and Industry (METI) of Japan to investigate the behavior of typical Nuclear Power Plant (NPP) piping systems under large seismic loads. This project was taken over and completed by JNES upon its establishment. The objectives of this program were to develop a better understanding of the elasto-plastic response and ultimate strength of nuclear piping systems, to ascertain the seismic safety margins in current piping design codes, and to assess new code allowable stress rules. The test program consisted of a series of static and dynamic material tests, piping component tests, simplified piping system tests, and large-scale piping tests. The test program consisted of four phases: (1) monotonic and...
