Not illustrated. 1902 Excerpt: . . . horn, sends out processes to all the muscles of the primitive body segment in which it is situated. The anterior root of a spinal nerve is thus formed. Other motor cells send out processes which reach viscera through the white rami communicantes and sympathetic system (Fig. 128). Fio. 128. --Diagram of the Nerve System of the llth Dorsal Segment. Fio. 129. --A diagram showing the derivation of the Parts of the Nerve System of the llth Segment in the Embryo. (2) Besides the anterior horn cells, two other nerve groups become connected with each segment. At the point where the medullary plates are cut off from the epiblast to form the neural canal, a crest, the neural crest, grows out on each side (Fig. 129) composed of the cells which formed the junctional line between medullary plates and epiblast. A group of these neuroblasts grows into...
