Excerpt: .3, because $3 \times \$60 = \180 ; by the second method we added on J, because $60 \text{ da.} - (-0 \text{ da.}) = 75 \text{ da.}$ N. B.--When advantage can be taken of both time and principal, if the student wishes to prove his work, he can first work it by the Bankers Method, and then by taking advantage of the principal, or vice versa. And as the two operations are entirely different, if the same result is obtained by fta/ih , he may fairly conclude that the work is correct On all notes that bear \$12 per annum, or any aliquot part or multiple of \$12. If a note bears \$12 per annum, it will certainly bear \$1 per month; hence the time in months would be the interest in \$; and the decimal parts of a month would be the interest in decimal parts of a \$; therefore when the note bears \$12 per annum we have...
