Previous research has never made an effort to quantify cultural risks, and in a second step, costs of Mergers and Acquisitions (M&A). This paper aims at developing a model that gives an indication of the conflict potential inherent to the cultural differences between transaction parties. The model shall also disentangle which culture type - national, corporate, professional, individual or deal culture - is most likely to clash, and which cultural elements are the determinants of that hazard. The model can be viewed as an early-stage tool that lays the groundwork for the development of cultural cost estimation instruments for M&A. 44 pp. Englisch.
